

Weekly Report Setup Guide — Optimum Prime Solutions

This guide walks you through the one-time setup needed to activate your automatic weekly reports.

What Gets Reported Every Monday at 8am

- **Website Traffic** (from Google Analytics 4): sessions, users, page views, top pages, traffic sources
 - **Chatbot Interactions** (from Firebase): chats started, leads captured, top topics discussed, lead names
-

Step 1: Google Analytics 4 — Service Account

1. Go to [Google Cloud Console](#)
 2. Create a new project (or use an existing one)
 3. Enable the **Google Analytics Data API**
 4. Go to **IAM & Admin** → **Service Accounts** and create a new service account
 5. Download the JSON key file and save it as `/home/ubuntu/weekly-report/ga4-credentials.json`
 6. Go to [Google Analytics](#) → Admin → Property Access Management
 7. Add the service account email (from the JSON file) as a **Viewer**
 8. Copy your **Property ID** (the number in the URL, e.g. `123456789`)
 9. Set the environment variable: `export GA4_PROPERTY_ID="properties/123456789"`
-

Step 2: Firebase — Service Account

1. Go to [Firebase Console](#) → Project Settings → Service Accounts
 2. Click **Generate new private key** and download the JSON file
 3. Save it as `/home/ubuntu/weekly-report/firebase-credentials.json`
-

Step 3: Gmail App Password (for Email Sending)

1. Go to your Google Account → Security → 2-Step Verification (must be enabled)
2. Scroll down to **App passwords** and create one for “Mail”
3. Set environment variables:

```
export REPORT_EMAIL_SENDER="optimumprimesolutionsltd@gmail.com"  
export REPORT_EMAIL_PASSWORD="your-16-char-app-password"
```

Step 4: WhatsApp via CallMeBot (Free)

1. Save the number **+34 644 59 77 58** in your WhatsApp contacts as “CallMeBot”
2. Send the message: `I allow callmebot to send me messages`
3. You will receive an API key in reply
4. Set the environment variable: `export CALLMEBOT_API_KEY="your-api-key"`

Step 5: Schedule Weekly Delivery (Every Monday 8am Nairobi Time)

Add this line to your crontab (`crontab -e`):

```
0 5 * * 1 GA4_PROPERTY_ID="properties/YOUR_ID" REPORT_EMAIL_SENDER="optimumprimesolutionsltd@gmail.com"
```

(5am UTC = 8am Nairobi EAT)

Step 6: Test the Report

Run manually to verify everything works:

```
export GA4_PROPERTY_ID="properties/YOUR_ID"
export REPORT_EMAIL_SENDER="optimumprimesolutionsltd@gmail.com"
export REPORT_EMAIL_PASSWORD="your-app-password"
export CALLMEBOT_API_KEY="your-key"
python3 /home/ubuntu/weekly-report/weekly_report.py
```

Environment Variables Summary

Variable	Description
GA4_PROPERTY_ID	GA4 property ID, e.g. <code>properties/123456789</code>
GA4_CREDENTIALS_FILE	Path to GA4 service account JSON (default: <code>./ga4-credentials.json</code>)
FIREBASE_CREDENTIALS_FILE	Path to Firebase service account JSON (default: <code>./firebase-credentials.json</code>)
REPORT_EMAIL_SENDER	Gmail address used to send the report
REPORT_EMAIL_PASSWORD	Gmail App Password (16 characters)
WHATSAPP_NUMBER	WhatsApp number without <code>+</code> , e.g. <code>254116246074</code>
CALLMEBOT_API_KEY	API key from CallMeBot setup
